

NBE Demo Knowledge Base — Accounts

DEMO / SYNTHETIC DATASET

This document is fictional training data created for an AI chatbot project. It is NOT an official National Bank of Egypt (NBE) product document and must not be used for real banking decisions, customer transactions, fees, rates, eligibility checks, or compliance purposes.

1. Account Types

- Demo Savings Account: designed for customers who want to save money while maintaining access to their funds.
- Demo Current Account: designed for customers who need frequent transactions and account-management services.
- Demo Youth Account: designed for eligible young customers and intended to encourage digital banking and saving habits.

2. Example Features

- Savings accounts may include account statements, ATM access, digital banking access, and internal transfers.
- Current accounts may support deposits, withdrawals, transfers, and selected payment services.
- Youth accounts may include simplified digital access and educational savings features.

3. Example Opening Requirements

- Valid national identification document or other accepted identification.
- Completed customer application and required KYC information.
- Additional documents may be requested depending on the customer profile and product.

4. Digital Account Access

- Customers can use the demo digital banking service to review balances, view transactions, transfer funds, and manage selected services.
- Sensitive credentials such as passwords, PINs, OTPs, and card security codes should never be shared with a chatbot.

5. Example FAQ

- Q: How do I open an account? A: Choose the suitable account type, complete the application, provide the required identification and KYC information, and follow the bank's approved onboarding process.
- Q: Can I access my account digitally? A: The demo dataset assumes that eligible customers can access selected account services through digital banking.
