

NBE Demo Knowledge Base — Cards

DEMO / SYNTHETIC DATASET

This document is fictional training data created for an AI chatbot project. It is NOT an official National Bank of Egypt (NBE) product document and must not be used for real banking decisions, customer transactions, fees, rates, eligibility checks, or compliance purposes.

1. Card Categories

- Demo Debit Card: linked to an eligible bank account and intended for purchases and ATM transactions.
- Demo Credit Card: intended for eligible customers and provides a predefined credit limit subject to approval.
- Demo Prepaid Card: loaded with a selected amount before use and intended for controlled spending.

2. Example Card Features

- ATM cash withdrawal may be available for eligible cards.
- Point-of-sale and online purchases may be supported depending on the card type.
- Some demo card variants may include transaction notifications and digital card-management features.

3. Credit Card Eligibility

- Eligibility is subject to the fictional bank's internal approval criteria.
- Applicants may need valid identification, income information, and other KYC documents.
- The chatbot must not promise approval or a specific credit limit.

4. Card Security

- Never share a full card number, PIN, CVV, OTP, password, or one-time authentication code with the chatbot.
- If a card is lost or suspected to be compromised, the customer should contact the bank through an official verified channel.

5. Example FAQ

- Q: What cards are available? A: The demo dataset contains debit, credit, and prepaid card categories.
- Q: Can I use a debit card online? A: Online usage depends on the specific card configuration and applicable controls.
- Q: What is a credit limit? A: It is the maximum amount a customer is authorized to use on a credit facility, subject to approval.
