

NBE Demo Knowledge Base — Loans

DEMO / SYNTHETIC DATASET

This document is fictional training data created for an AI chatbot project. It is NOT an official National Bank of Egypt (NBE) product document and must not be used for real banking decisions, customer transactions, fees, rates, eligibility checks, or compliance purposes.

1. Loan Categories

- Demo Personal Loan: intended for eligible customers who need personal financing.
- Demo Auto Loan: intended for eligible customers financing a vehicle purchase.
- Demo Home Finance: intended for eligible customers seeking financing related to a residential property.

2. Example Eligibility Factors

- Customer identity and KYC information.
- Income and employment information.
- Credit assessment and repayment capacity.
- Additional product-specific documents or conditions.

3. Example Application Process

- Select a suitable financing product.
- Submit the application and required documents.
- The bank reviews eligibility and performs the required credit assessment.
- If approved, the financing terms are communicated and the customer completes the applicable agreement process.

4. Repayment

- Repayment schedules depend on the approved financing terms.
- The chatbot should never invent an interest rate, installment amount, tenure, or approval decision.
- Customers should verify current pricing and terms through official bank channels.

5. Example FAQ

- Q: What loans are available? A: The demo dataset contains personal, auto, and home-finance categories.
- Q: Can the chatbot approve my loan? A: No. The chatbot can explain the documented process but cannot approve, reject, or modify a loan application.
